SUSTAINABILITY PLEDGE

We have removed all plastic straws, stirrers and plastic bottles from the bar, restaurant, and rooms.

SUSTAINABILITY PLEDGE

Our kitchen is cooking on gas...or should we say electric! We have removed all gas appliances from our kitchen and replaced them with electric units to cut our gas consumption and increase the use of more renewable energy.

SUSTAINABILITY PLEDGE

Our hotel grounds not only look good, but they do good too. From planting plenty of bee-friendly flowers in our gardens to support the local eco-system, to creating our very own bee hives... The Wood Norton is home to guests large and small.

SUSTAINABILITY PLEDGE

We have teamed up with Wood Norton Richmond Villages and SPE Ltd to install a new state of the art sewage treatment plant that will significantly improve wastewater quality prior to discharging it into the environment.

SUSTAINABILITY PLEDGE

We are no longer using any single use plastics when it comes to our shower gels and shampoos and we now exclusively use re-usable containers in our wash-rooms.

SUSTAINABILITY PLEDGE

We have mapped out the next stages in our sustainable journey, including the review of The Wood Norton supply chain, together with the installation of a food composter to prevent kitchen waste and electric vehicle [EV] charging points within the hotel carpark. We are also looking at our internal processes to see how we can make them more sustainable.

SUSTAINABILITY PLEDGE

Wake up and smell the sustainable coffee...That's right all Wood Norton coffee is directly sourced from Lavazza, not only renowned for its great taste and superior quality, but also its sustainability.
